International application No. PCT/KR2004/000537

A. CLASSIFICATION OF SUBJECT MATTER

IPC7 A61F 5/04, A61F 13/14, A61F 5/02, A61F 5/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols) IPC7 A61F 5/00, 5/02, 5/03, 5/04, 13/14

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched Korean patents and applications for inventions since 1975

Korean utility models and applications for utility models since 1975

Electronic data base consulted during the intertnational search (name of data base and, where practicable, search terms used) KIPASS, CA

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

International application No. PCT/KR2004/000537

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet) This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: because they relate to subject matter not required to be searched by this Authority, namely: Claims Nos.: 7-11 because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically: Claims 7-11 are considered to lack clarity, contrary to the requirement of PCT Rule 6.3(b), since they do not contain all the technical features essential to the definition of the wrinkled band. Moreover, they are not supported by the description as required by PCT Article 6, as their cope is broader than justified by the description and drawings. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a). Observations where unity of invention is lacking (Continuation of item 3 of first sheet) Box No. III This International Searching Authority found multiple inventions in this international application, as follows: 1) Claims 1-6 are directed to a manufacturing method for a wrinkled band. 2) Claims 7-10 are directed to a wrinkled band comprising a protection pad wing combined with the border frame of the wrinkled band by needlework. 3) Claims 11 is directed to a wrinkled band formed incision parts on the border frame of the wrinkled band. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any addition fee. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.: No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.
